[illegible]

TITLE

Method and Materials

Sample. A total of 100 subjects, 50 females and 50 males, ranging in age from 18 to 35 years, were recruited from a local university. The subjects were randomly assigned to two groups of 50 subjects each. The first group was assigned to the control condition, and the second group was assigned to the treatment condition. The subjects were all students at the university and were not compensated for their participation in the study.
